PERSONAL SUMMARY

I am presently employed in the oil and gas industry working in the Antwerp area as a senior E/I inspector. I have a strong understanding of many aspects of this environment. I have developed strong communication skills together with the ability to be self-motivated. I am always willing to learn new skills to advance my career.

WORK EXPERIENCE

BUREAU VERITAS

SENIOR QA/QC E&I INSPECTOR – OCTOBER 17- PRESENT

ANWERUP PROJECT – EXXONMOBIL/ESSO ANTWERP REFINERY

Responsible for all 3rd party inspections in compliance local and atex regulations. This included witnessing of testing activities before energisation, detailed inspection of all E/I equipment and verification of accurate drawings and schematics. Also, test and inspection of all incoming vendor equipment to site. Constant communication with the client was essential to ensure efficient working between multiple contractors

ISTIMEWA ELEKTRO/STORK

MC/QAQC/PRE-COMMISSIONING CO-ORDINATOR – MARCH 17- OCTOBER 17

OSEBERG VESTFLANKEN WELLHEAD PLATFORM (STATOIL) – HEEREMA ZWIJNDRECHT/ BORKUM RIFFGRUND SUBSTATION (DONG)– HSM YARD, SCHEIDAM

Taking the lead over various E/I roles, responsibilities included planning work scopes according to deadlines, liaising with client for walk-downs and approvals, creating work packages for MC and Pre-commissioning scope, operating the SCADA control system during Pre-Comm activities and hand-over of completed systems. All work carried out in compliance with ATEX standards

DORNAN ENGINEERING

ELECTRICAL COMMISSIONING TECHNICIAN – JANUARY 17- MARCH 17

TOTAL REFINERY– ANTWERP, BELGIUM

Working as part of a multi discipline and multi-national team, Responsibilities included commissioning of all LV and HV systems including switchgear, lighting systems, motors trace heating and MOV valves. Work was carried out in a live active plant.

FES-EX LTD

E&I ATEX INSPECTOR NOVEMBER 16 - PRESENT

ZENITH ENERGY TERMINAL – AMSTERDAM, HOLLAND

Working as part of a small inspection team, my responsibilities included inspection of existing equipment and accessories, determining if any modifications are required to make the equipment compliant. I was also responsible for carrying out any upgrades required followed by re-inspection. This work was carried out on a live storage facility.

HEEREMA FABRICATION GROUP (HFG)

E&I COMMISSIONING SUPERVISOR JANUARY 2015 – NOVEMBER 2016

MARATHON ALBA B3 PLATFORM / EQUATORIAL GUINEA (OFFSHORE)

Part of the initial hook-up team to start the offshore project which included the start-up of temporary generators and electrical supplies, the positioning of the jacket and lifting of the platform, flare stack and bridge. All work was completed from aboard the SSCV Thialf. Liaising with the Thialf time to prepare platform for lifting and removal of sea fastening, bumpers etc.

Supervising multi discipline teams, duties included co-ordination of work for the week ahead, gathering of MSDS information and creation of job packs including material, permits and JSA/TRA.

Supervised various commissioning activities including fire and gas systems, turbine generator systems, HVAC, PAGA and telecoms, small power and lighting, air compressor/nitrogen system and loop checking of all instrumentation. This included organisation of manpower, arranging rotas, ordering materials and following commissioning procedures alongside the client

E&I COMMISSIONING TECHNICIAN AUGUST 2015-DECEMBER 2015

HEEREMA ZWIJNDRECHT YARD/VLISSINGEN YARD – MARATHON ALBA B3 PLATFORM

Working on a gas compression module, daily tasks included a period as an electrical responsible person in charge of all LOTO on the module and switching, part of this was to maintain the temporary generators that were supplying the platform during the commissioning stage. Working under PTW conditions to commission fire and gas systems, turbine generator systems, PAGA and telecoms, small power and lighting, air compressor/nitrogen system and multiple type of instrumentation.

These works included working closely with vendors such as Powell, GE, Emerson, PNS and solar

Through this project I have become qualified as a marathon red badge holder which gives unlimited access to all plan and a level 3 task supervisor, a role which I have been in since the beginning of the offshore phase

COFELY/GDF SUEZ

ELECTRICAL TECHNICIAN JUNE 2015 – AUGUST 2015

HSM OFFSHORE FABRICATION –ROTTERDAM – various offshore platforms

Working with a multi-nationality team, Main duties included glanding and terminating of various devices and instrumentation including I.S, fire and gas and power system, later followed by testing and inspection of these systems.

SPIE WHS

ELECTRICAL TECHNICIAN – JANUARY 2015 – JUNE 2015

Hereema fabrication group – Cygnus bravo platform –GDF suez

working on the testing and inspection squad, duties included testing and inspection of atex equipment, rectification of faults found, recording of test and inspection results and liaising with commissioning team to complete work packs. I stayed on the project once the platform had sailed to create job cards and work packs for the offshore scope.

ELECTRICAL TECHNICIAN – SEPTEMBER 2013 – JANUARY 2015

working offshore on the 47/3b platform in the roughfield, projects have included the installation of a new **PA/GA system** and **fire and gas system**.

Within these projects I have carried out the installation, inspection, testing and commissioning of ATEX equipment and various other electrical components. This included panel wiring in both I.S circuits and power boards.

Along with these two projects, I have also undertaken works upon trace heating circuits, ESD upgrades, and general power and lighting replacements

During my time here, I have undertaken a permits course which enables me to take out permits on the installation

FIREPOINT SERVICES LTD

MAINTAINANCE ENGINEER – JUNE 2009 – SEPTEMBER 2012

Working mainly individually, I was responsible for PAT testing, emergency light testing and fire alarm maintenance at various businesses across the UK, ranging from industrial premises to domestic premises such as student accommodation.

This included the upgrade of obsolete systems and replacement of faulty devices and fittings. I was also responsible for certifications for systems and organising my own work for mine and the companies benefit.

VENUS ELECTRICAL LTD

ELECTRICIAN – JUNE 2007 – JUNE 2009 and SEPTEMBER 2012 – SEPTEMBER 2013

Working in a small team of electricians, completed multiple installations on commercial and industrial sites for major clients including **Benfield motors** and **De La Rue currencies**.

Benfield motors

Installations ranged from office refurbishment to new construction of motor repair garages. Also responsible for maintenance of these premises which included periodic testing of installations to minor works such as light fitting repairs and fault finding.

De La Rue currencies

Main duties and roles included printer upgrades, refurbishment of factory and warehouse including mains power supply replacement. Most works undertaken out of hours, and always supervised by security due to surrounding environment.
